

Albany International Reports Second-Quarter 2021 Results, Raises 2021 Guidance

July 26, 2021

ROCHESTER, N.H.--(BUSINESS WIRE)--Jul. 26, 2021-- Albany International Corp. (NYSE:AIN) today reported operating results for its second quarter of 2021, which ended June 30, 2021. Additionally, the company raised its financial guidance for 2021.

"We are pleased to report another quarter of solid performance," said Bill Higgins, President and CEO. "We delivered revenues of \$235 million as well as profitability and free cash flow near record levels. Both business segments contributed to the strong results. Our Machine Clothing segment continued to experience solid demand from customers across the globe. In our Engineered Composites segment, performance remains very good - particularly in light of the headwinds caused by the ongoing destocking in the commercial aerospace supply chain. We are executing well on our defense programs and preparing to meet planned increases on OEM production rates on our narrow body commercial programs."

"We had a great first half of 2021," added CFO, Stephen Nolan. "Our consistent operating performance, near record free cash flow, and strong balance sheet position us well as global markets recover. At this stage, we believe that we have sufficient insight into that recovery and our operational performance to be able to raise our full year revenue and profit guidance, including raising the guidance midpoint of GAAP EPS and Adjusted EPS, each by over \$0.40."

For the second quarter ended June 30, 2021:

- Net sales were \$234.5 million, up 4%, or 1% after adjusting for currency translation rates, when compared to the prior year.
- Gross profit of \$101.7 million was 1% lower than the \$103.0 million reported for the same period of 2020.
- Selling, Technical, General, and Research (STG&R) expenses were \$51.8 million, compared to \$47.4 million in the same period of 2020. The increase was driven by higher incentive compensation, travel, Research and Development costs, and revaluation of foreign currency balances, which increased STG&R by \$1.9 million in 2021, compared to an increase of \$1.1 million in the same period of 2020.
- Operating income was \$50.0 million, compared to \$52.7 million in the prior year, a decrease of 5%, principally due to higher STG&R expenses, partially offset by lower restructuring expenses.
- The effective tax rate was 30.0%, compared to 32.1% for the second quarter of 2020. A lower share of our global profits in jurisdictions with higher tax rates contributed to the lower tax rate this quarter compared to that for the second-quarter 2020.
- Net income attributable to the Company was \$31.4 million (\$0.97 per share), compared to \$32.4 million (\$1.00 per share) in the second quarter of 2020. Adjusted earnings per share (or Adjusted EPS, a non-GAAP measure) was \$1.01 per share, compared to \$1.09 for the same period of last year.
- Adjusted EBITDA (a non-GAAP measure) was \$69.4 million, compared to \$73.7 million in the second quarter of 2020, a decrease of 6%.

Please see the tables below for a reconciliation of non-GAAP measures to their comparable GAAP measures.

Outlook for Full-Year 2021

Albany International is updating financial guidance for the full-year 2021:

- Total company revenue between \$880 and \$910 million;
- Effective income tax rate, including tax adjustments, of 28% to 30%;
- Total company depreciation and amortization of approximately \$75 million;
- Capital expenditures in the range of \$40 to \$50 million;
- GAAP earnings per share between \$2.84 and \$3.14 and Adjusted earnings per share between \$2.90 and \$3.20;
- Total company Adjusted EBITDA between \$225 to \$240 million;
- Machine Clothing revenue between \$585 to \$600 million;
- Machine Clothing Adjusted EBITDA between \$210 and \$220 million;
- Albany Engineered Composites (AEC) revenue between \$290 to \$310 million; and
- Albany Engineered Composites Adjusted EBITDA between \$65 to \$70 million.

(a) In Q1 2020, the company recorded losses of approximately \$17 million in jurisdictions where it cannot record a tax benefit from the losses, which results in an unusual relationship between the pre-tax and after-tax amounts.

The following table provides a reconciliation of Earnings per share to Adjusted Earnings per share:

Three months ended June 30, Six months ended June 30,

| Per share amounts (Basic) | 2021 | 2020 | 2021 | 2020 |
|-----------------------------|---------|---------|---------|---------|
| Earnings per share (GAAP) | \$ 0.97 | \$ 1.00 | \$ 1.82 | \$ 1.28 |
| Adjustments, after tax: | | | | |
| Restructuring expenses, net | _ | 0.06 | _ | 0.07 |

| Foreign currency revaluation (gains)/losses | 0.03 | 0.02 | 0.04 | 0.44 |
|---|---------|---------|---------|---------|
| Former CEO termination costs | _ | _ | _ | 0.06 |
| Acquisition/integration costs | 0.01 | 0.01 | 0.02 | 0.02 |
| Adjusted Earnings per share (non-GAAP) | \$ 1.01 | \$ 1.09 | \$ 1.88 | \$ 1.87 |

The calculations of net debt are as follows:

| (in thousands) | June 30, 2021 | March 31, 2021 | December 31, 2020 |
|--------------------------------------|---------------|----------------|-------------------|
| Current maturities of long-term debt | \$ — | \$ 2 | \$ 9 |
| Long-term debt | 350,000 | 384,000 | 398,000 |
| Total debt | 350,000 | 384,002 | 398,009 |
| Cash and cash equivalents | 253,330 | 237,871 | 241,316 |
| Net debt (non-GAAP) | \$ 96,670 | \$ 146,131 | \$ 156,693 |

The tables below provide a reconciliation of forecasted full-year 2021 Adjusted EBITDA and Adjusted EPS (non-GAAP measures) to the comparable GAAP measures:

| Forecast of Full Year 2021 Adjusted EBITDA | Machine Clothing | | AEC | | |
|--|------------------|--------|-------|-------|--|
| (in millions) | Low | High | Low | High | |
| Net income attributable to the Company (GAAP) (b) | \$ 189 | \$ 198 | \$ 15 | \$ 19 | |

⁽c) Due to the uncertainty of these items, we are unable to forecast these items for 2021. The amount shown represents the value incurred through the second quarter.

About Albany International Corp.

Albany International is a leading developer and manufacturer of engineered components, using advanced materials processing and automation

⁽d) Calculations based on shares outstanding estimate of 32.4 million

capabilities, with two core businesses. Machine Clothing is the world's leading producer of custom-designed, consumable fabrics and process belts essential for the manufacture of all grades of paper products. Albany Engineered Composites is a growing designer and manufacturer of advanced materials-based engineered components for demanding aerospace applications, supporting both commercial and military platforms. Albany International is headquartered in Rochester, New Hampshire, operates 23 facilities in 11 countries, employs approximately 4,000 people worldwide, and is listed on the New York Stock Exchange (Symbol AIN). Additional information about the Company and its products and services can be found at www.albint.com.

Non-GAAP Measures

This release, including the conference call commentary associated with this release, contains certain non-GAAP measures, including: net sales, and percent change in net sales, excluding the impact of currency translation effects (for each segment and on a consolidated basis); EBITDA and Adjusted EBITDA (for each segment and on a consolidated basis, represented in dollars or as a percentage of net sales); Net debt; and Adjusted earnings per share (or Adjusted EPS). Such items are provided because management believes that they provide additional useful information to investors regarding the Company's operational performance.

Presenting Net sales and increases or decreases in Net sales, after currency effects are excluded, can give management and investors insight into underlying sales trends. Net sales, or percent changes in net sales, excluding currency rate effects, are calculated by converting amounts reported in local currencies into U.S. dollars at the exchange rate of a prior period. These amounts are then compared to the U.S. dollar amount as reported in the current period.

EBITDA, Adjusted EBITDA and Adjusted EPS are performance measures that relate to the Company's continuing operations. EBITDA, or net income with interest, taxes, depreciation, and amortization added back, is a common indicator of financial performance used, among other things, to analyze and compare core profitability between companies and industries because it eliminates effects due to differences in financing, asset bases and taxes. The Company calculates EBITDA by removing the following from Net income: Interest expense, net, Income tax expense, Depreciation and amortization expense. Adjusted EBITDA is calculated by: adding to EBITDA costs associated with restructuring, former CEO termination costs, and inventory write-offs associated with discontinued businesses; adding charges and credits related to pension plan settlements and curtailments; adding (or subtracting) revaluation losses (or gains); subtracting (or adding) gains (or losses) from the sale of buildings or investments; subtracting insurance recovery gains in excess of previously recorded losses; adding acquisition/integration costs and subtracting (or adding) Income (or loss) attributable to the non-controlling interest in Albany Safran Composites (ASC). Adjusted EBITDA may also be presented as a percentage of net sales by dividing it by net sales. An understanding of the impact in a particular quarter of specific restructuring costs, former CEO termination costs, acquisition/integration costs, currency revaluation, inventory write-offs associated with discontinued businesses, or other gains and losses, on net income (absolute as well as on a per-share basis), operating income or EBITDA can give management and investors additional insight into core financial performance, especially when compared to quarters in which such items had a greater or lesser effect, or no effect. Restructuring expenses, while frequent in recent years, are reflective of significant reductions in manufacturing capacity and associated headcount in response to shifting markets, and not of the profitability of the business going forward as restructured. Adjusted earnings per share (Adjusted EPS) is calculated by adding to (or subtracting from) net income attributable to the Company per share, on an after-tax basis: restructuring charges; former CEO severance costs; charges and credits related to pension plan settlements and curtailments; inventory write-offs associated with discontinued businesses; foreign currency revaluation losses (or gains); acquisition-related expenses; and losses (or gains) from the sale of investments.

EBITDA, Adjusted EBITDA, and Adjusted EPS, as defined by the Company, may not be similar to similarly named measures of other companies. Such measures are not considered measurements under GAAP, and should be considered in addition to, but not as substitutes for, the information contained in the Company's statements of income.

The Company discloses certain income and expense items on a per-share basis. The Company believes that such disclosures provide important insight into underlying quarterly earnings and are financial performance metrics commonly used by investors. The Company calculates the quarterly per-share amount for items included in continuing operations by using an income tax rate based on either the tax rates in specific countries or the estimated tax rate applied to total company results. The tax rate applied excludes income tax adjustments (discrete tax adjustments and the effect of changes in the estimated income tax rate). The after-tax amount is then divided by the weighted-average number of shares outstanding for each period. Year-to-date earnings per-share effects are determined by adding the amounts calculated at each reporting period.

Net debt is, in the opinion of the Company, helpful to investors wishing to understand what the Company's debt position would be if all available cash were applied to pay down indebtedness. The Company calculates Net debt by subtracting Cash and cash equivalents from Total debt. Total debt is calculated by adding Long-term debt, Current maturities of long-term debt, and Notes and loans payable, if any.

Forward-Looking Statements

This press release may contain statements, estimates, guidance or projections that constitute "forward-looking statements" as defined under U.S. federal securities laws. Generally, the words "believe," "expect," "intend," "estimate," "anticipate," "project," "will," "should," "look for," "guidance," "guide," and similar expressions identify forward-looking statements, which generally are not historical in nature. Because forward-looking statements are subject to certain risks and uncertainties (including, without limitation, those set forth in the Company's most recent Annual Report on Form 10-K or Quarterly Report on Form 10-Q), actual results may differ materially from those expressed or implied by such forward-looking statements.

Forward-looking statements in this release or in the webcast include, without limitation, statements about macroeconomic and paper-industry trends and conditions during 2021 and in future years; expectations in 2021 and in future periods of sales, EBITDA, Adjusted EBITDA (both in dollars and as a percentage of net sales), Adjusted EPS, income, gross profit, gross margin, cash flows and other financial items in each of the Company's businesses, and for the Company as a whole; the timing and impact of production and development programs in the Company's AEC business segment and the sales growth potential of key AEC programs, as well as AEC as a whole; the amount and timing of capital expenditures, future tax rates and cash paid for taxes, depreciation and amortization; future debt and net debt levels and debt covenant ratios; and changes in currency rates and their impact on future revaluation gains and losses. Furthermore, a change in any one or more of the foregoing factors could have a material effect on the Company's financial results in any period. Such statements are based on current expectations, and the Company undertakes no obligation to publicly update or revise any forward-looking statements.

Statements expressing management's assessments of the growth potential of its businesses, or referring to earlier assessments of such potential, are not intended as forecasts of actual future growth, and should not be relied on as such. While management believes such assessments to have a reasonable basis, such assessments are, by their nature, inherently uncertain. This release and earlier releases set forth a number of assumptions regarding these assessments, including historical results, independent forecasts regarding the markets in which these businesses operate, and the timing and magnitude of orders for our customers' products. Historical growth rates are no guarantee of future growth, and such independent forecasts and assumptions could prove materially incorrect in some cases.
