Under the agreement, Albany continues to manufacture about 300 unique composite fuselage frames for the 787 Dreamliner, including forward sections 41 and 43 and aft section

47. Albany has produced composite fuselage frames for Sections 41 and 43 since Boeing's original award in 2014.

"We are excited to continue this partnership, built over more than a decade of successful collaboration," said Chris Stone, president of Albany Engineered Composites. "Albany is fully committed to supporting the ramp of the 787 program with the consistency, quality and reliability our customers have come to expect from Albany. We remain focused on delivering high-performance components at scale while continuing to advance our manufacturing efficiency and operational excellence across the business."

The Boeing 787 work is performed at Albany's facility in Salt Lake City, Utah.

About Albany Engineered Composites

Albany Engineered Composites, Inc., a segment of Albany International Corp. (NYSE: AIN), designs and manufactures advanced engineered composite components for engine and airframe applications in commercial and military aircraft, missiles and unmanned vehicles. AEC's specialty composite solutions enable current and next-generation aircraft to perform better while being more fuel efficient, cost effective and environmentally friendly.
